## DR. MAYO'S LECTURE

At the Second Presbyterian Church  
Last Evening.

## "HOW DOES EDUCATION PAY?"

He Asks, and Answers his Query in a Very Entertaining Discourse, which is Enjoyed by a Large Audience. Education is Worth all its Costs and More—Mothers Must be Educated.

At the Second Presbyterian church last evening Dr. Mayo delivered a popular lecture, his topic being, "How Does Education Pay?" The church was pretty well filled, about all the city teachers being among the auditors, and no one went away without having been both profited and pleased. Before the lecture Mr. C. Zulauf sang a bass solo, which was also much enjoyed.

In all American cities, Dr. Mayo said, education is one of the greatest lines of art. New York this year will spend \$20,000,000, while the whole country will spend \$150,000,000 on schools. How does universal education pay? The London Times lately said that the United States is the richest country in the world. Within the last fifty years the system of universal education has been built up. The common public school is the centre of the whole system. It is unsectarian, and still moral and religious. In addition there is a great assemblage of schools, including private schools, colleges, universities, schools of technology and the like.

No one can get too much education, but millions may and do grow up in ignorance.

The highest object of life is to make good American citizens.

Education bears the same situation to life as the ball does to the house.

As the king bolt is to the vehicle, so is the school to society. I speak of a good school. The old-fashioned poor school, compared with such schools as I visited to-day, is like the old immigrant wagon to the fine vestibuled train. The teacher gives character to the school. The schools are sometimes a kind of charitable institution to supply an impecunious man or woman with the necessities of life.

Education pays by training the mind, building character, making good citizens of the great American republic.

The school is the great moral educator of the country, and it is practically a religious force in the land.

To say that our schools are Godless is to draw up a bill of indictment against the whole people.

The child needs a good home, a good church, and a good common school. This school is for the state to train its future citizens.

The school represents a miniature republic. In the school room many of the pupils are in a higher plane than at home. In the school they are taught punctuality, concentration of mind and honesty. In the school yard evil things, such as the bottle and the pistol, are not found. Children are taught politeness, also civic virtues, such as respect for authority, respect for each other's rights. Each one stands on his own merits.

The teacher should be moral, or the school will retrograde. Children are not driven to virtue, but are led to it. In Europe society is organized from the top downward, while in the United States it is built from the bottom upward. The unrest of the people of Europe frequently disturbs the whole nation like an earthquake. Eighty per cent of the people in this country worth \$100,000 came up from the poorer classes, while only fifteen per cent of those who have money left them hold to it.

There is one state in this union where the majority of the people cannot read, and in many of them a large per cent of them can not read. A house built on a wet place will be unhealthy; so society with an ignorant and wicked sub-stratum will be vicious. As the houses in Chicago were raised up and made suitable for residences, so must society be raised up by education.

When Washington was president we had but 3,000,000 people; now we have 65,000,000. We are the richest people in the world.

It is because so much brain is put into the business of the country. The labor-saving machinery has done more to elevate the people than any other thing. One spinning machine is equal to 1,100 old-fashioned spinning wheels, yet this machine is operated by a boy. Skilled labor is the only labor that will be profitable in this country. Universal education builds up the American home. Only the educated American woman can build up a home. When she makes bread she is always stirring in judgment. No people is so favored as we, but we waste more than any other people. The derangement of the stomach caused by wrong preparations of food is the cause of more trouble than the drink habit.

In addition to cooking right, the educated American woman will rightly steer the boy just when he is neither a boy nor man. The only one that can do anything with him is the educated American woman, the mother, the sister or teacher.

Education teaches people to live together in peace and harmony. This thought led to an eloquent and pleasing conclusion.

## A MINISTER HURT.

Rev. Mr. Helms, of Cameron, Seriously Injured in a Runaway.

On last Tuesday Rev. Will T. Helms, who has been holding revival services on the New Martinsville M. E. circuit, met with a very painful accident. He was out driving with another gentleman in a sulky. The horse became frightened and ran away. Mr. Helms, thinking he could get the horse under control by getting on his back, stepped out on the shaft of the vehicle. It broke as he stepped upon it and he fell to the ground at the horse's feet, under the wheels. He was dragged for some distance in this manner. The horse was finally stopped, and had it not been that the other gentleman was with him he would likely have been killed. He received several cuts on his head and ear, also on other parts of his body. His legs were badly bruised. He was so badly hurt that he had to give up the meetings he was holding. He was taken care of at New Martinsville until yesterday, when he was removed to his home in Cameron.

It is only of late years that rheumatism has been treated as a blood disease. But that this is a correct theory is proved by the extraordinary success attending the use of Ayer's Sarsaparilla, in this painful and very prevalent malady. It seldom fails of radical cure.

Shoe Seller, 1019 Main Street.

## THE TICKET AGENTS.

Something of their Trip of Eight Thousand Miles to and From the Pacific.

Ed. C. Schoon, the popular ticket man at the Pan-Handle ticket office, who has just returned from the trip of the ticket agents' association on the Pacific slope, is full of interesting stories relating to his experiences. The party numbered about two hundred, and altogether traveled over eight thousand miles during the twenty two days of the trip. Ed. was particularly pleased with his Southern California experiences, the party visiting Los Angeles, San Diego, Pasadena, Riverside and the other towns of the orange belt.

When the ticket agents arrived at Los Angeles the annual "infesta" was in progress, and on their arrival they were met at the depot by fifty real live Indians who preceded the railroaders in the procession. This was one time when the "scalpers" got ahead of the "legits." A pleasing feature was the visit in a special steam yacht to the Catalina islands off the coast from San Pedro, near Los Angeles. At San Francisco the party was sumptuously entertained, and the ladies pretty nearly bought every thing in sight in Chinatown. The return trip was made over the Central Pacific and stops were made at Salt Lake, where the great Mormon tabernacle with its \$100,000 organ was seen, Manitou, Denver, Pike's Peak, etc.

Others who were in the party from this section were Arthur Walling, of the Cleveland &amp; Pittsburgh, Bridgeport, John Turner, of Baltimore's Union ticket office, and Mr. and Mrs. O. R. Wood.

## The Wool Market.

The Cadiz, Ohio, Republican says: There have been some wool purchases in this county recently, which indicate that the manufacturers want the wool, and are willing to pay current prices for it. Besides the purchases referred to in this paper of the wool which was bought last summer by the agents of the Bradford Brothers, of Barnesville, and stored in warehouses at Doerville and Tippecanoe, amounting to about 150,000 pounds in all, there has been sold to Horkheimer Brothers, of Wheeling, at twenty-one cents—the unmerchantable to be thrown out. This is about the price that the wool was bought for last summer. The clip of Mr. John S. Adams, of Stock township, sold recently, brought twenty-one cents.

Pierce Guar-  
antees a Cure.

Dr. R. V. Pierce: Dear Sir—When about three years old I was taken with mumps, also had fever, finally I had that dreaded disease Scrofula. The most eminent physicians in this section treated me to no avail. I had running scrofulous sores on left side of neck and face. I was small and weakly when eight or nine years old, and in fact was nearly a skeleton. Six bottles of Dr. Pierce's Golden Medical Discovery very wrought marvelous changes. Although the sores were healed in eight months, I did not quit taking it until I was cured of my system. The H. M. HOLLEMAN, only signs left of the dreadful disease are the scars which ever remind me of how near death's door I was until rescued by the "Discovery." I am now eighteen years old and weigh 135 pounds; and have not been sick in five years. Yours respectfully HARVEY M. HOLLEMAN, Agent for Seaboard Air Line.
